

Products for the railway industry

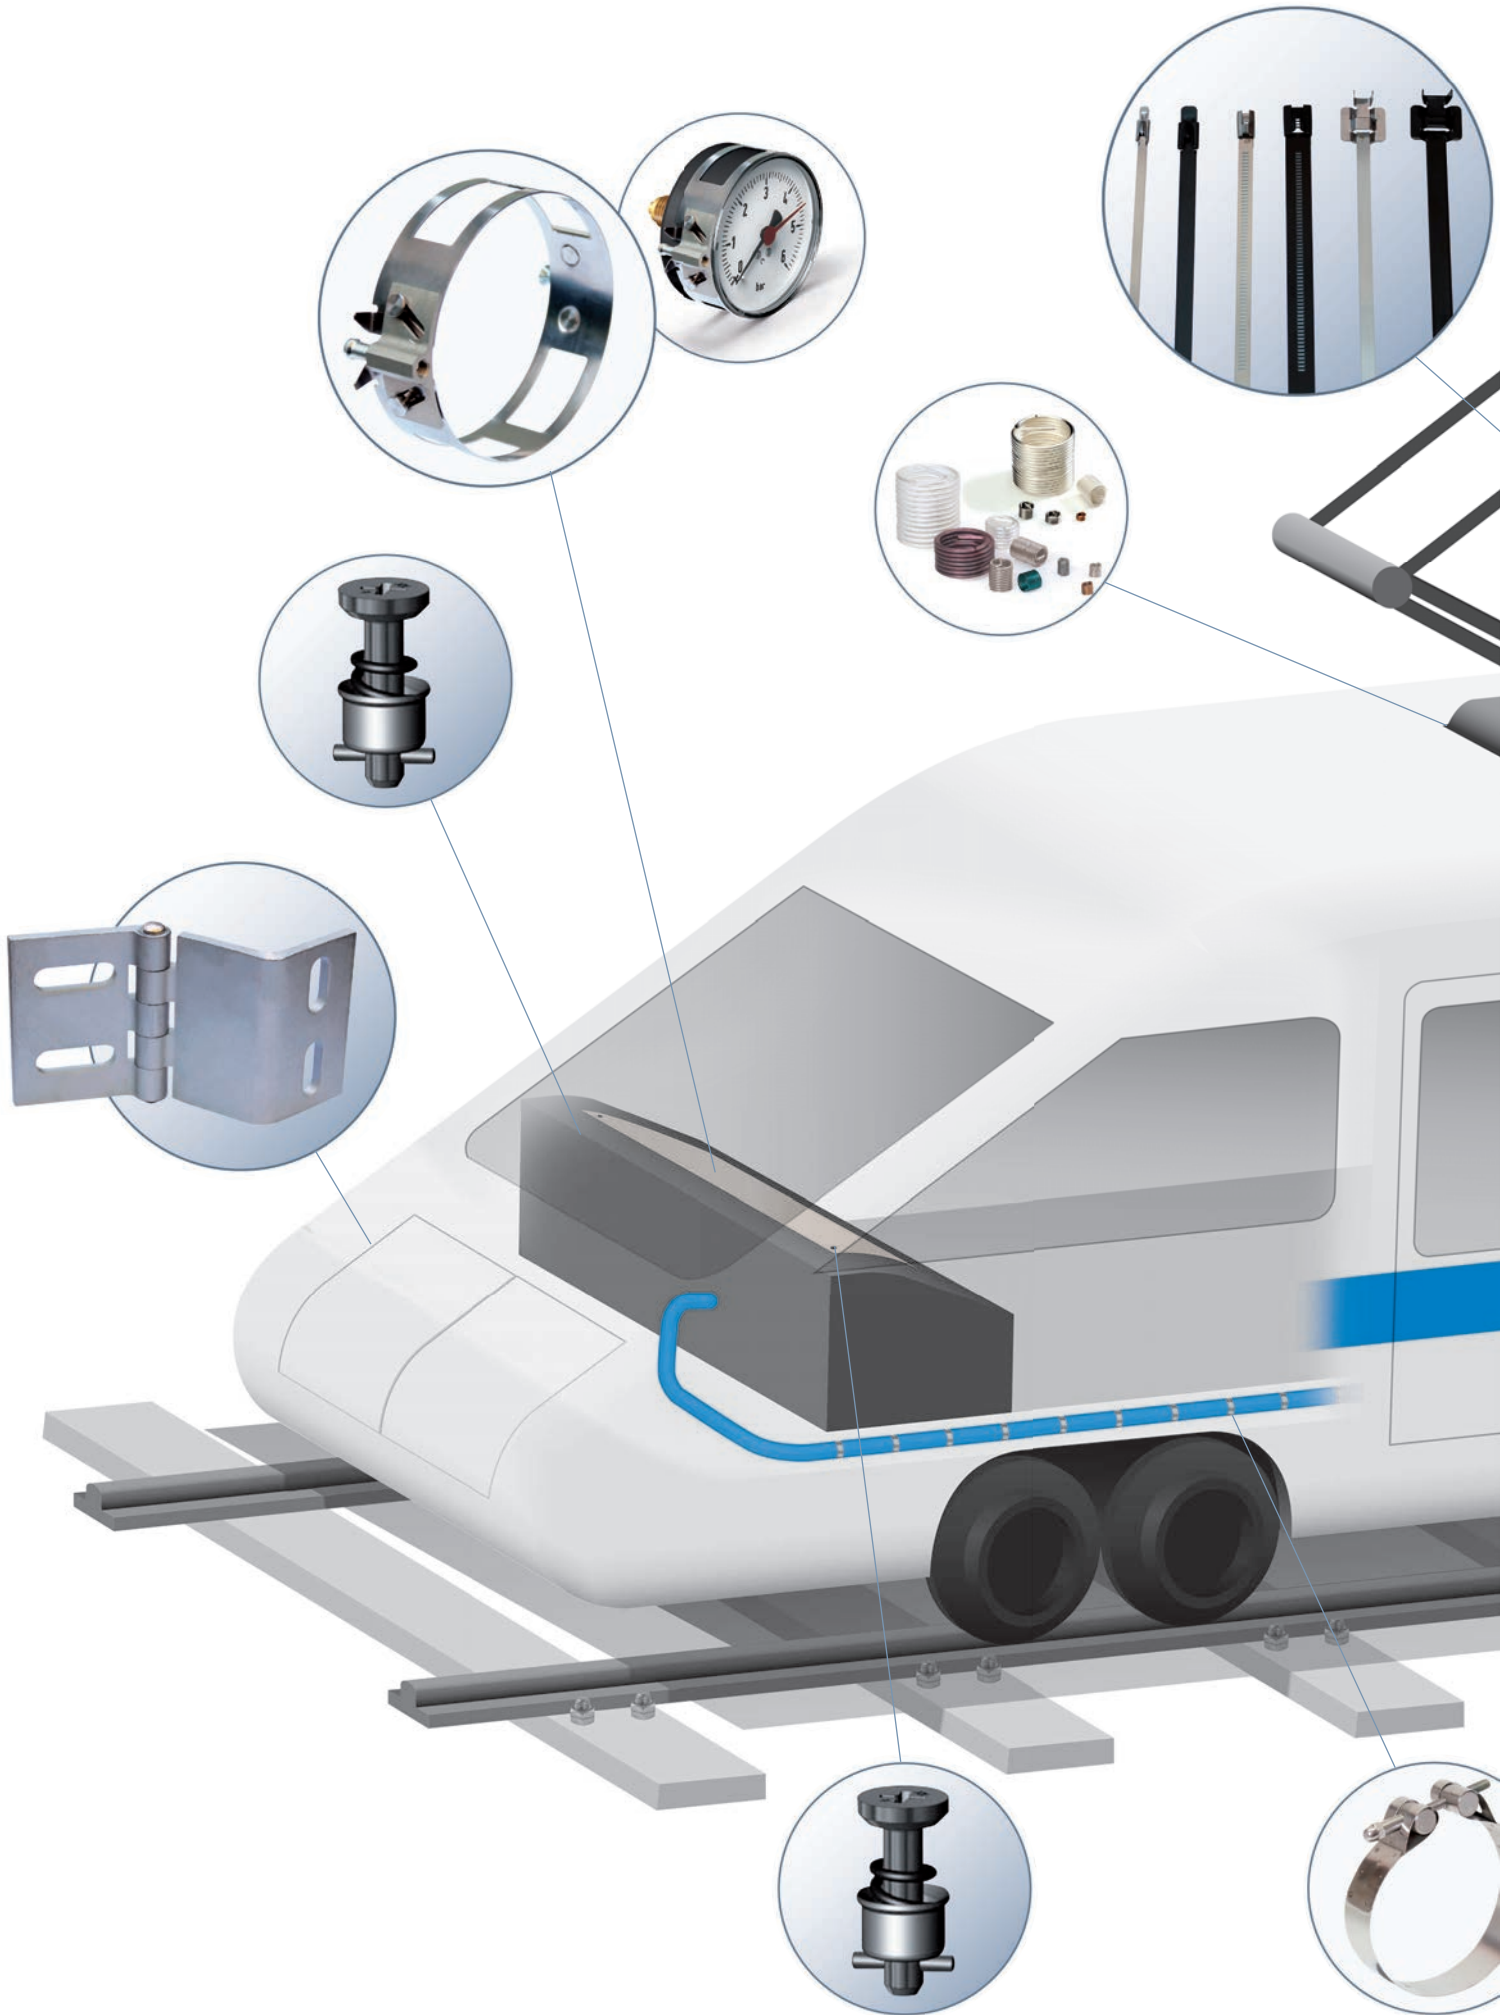

Easy handling and perfect matching functionality – this is how we design and produce products at HoKon. In accordance with the engineering department we develop products, that have hardly any limits.

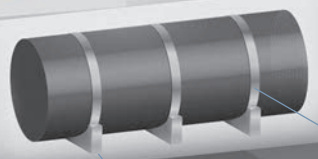

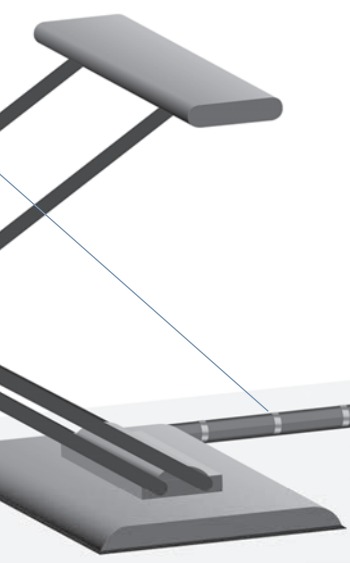

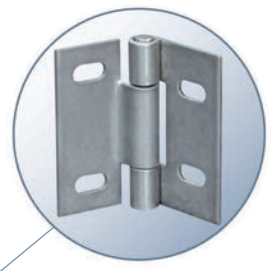

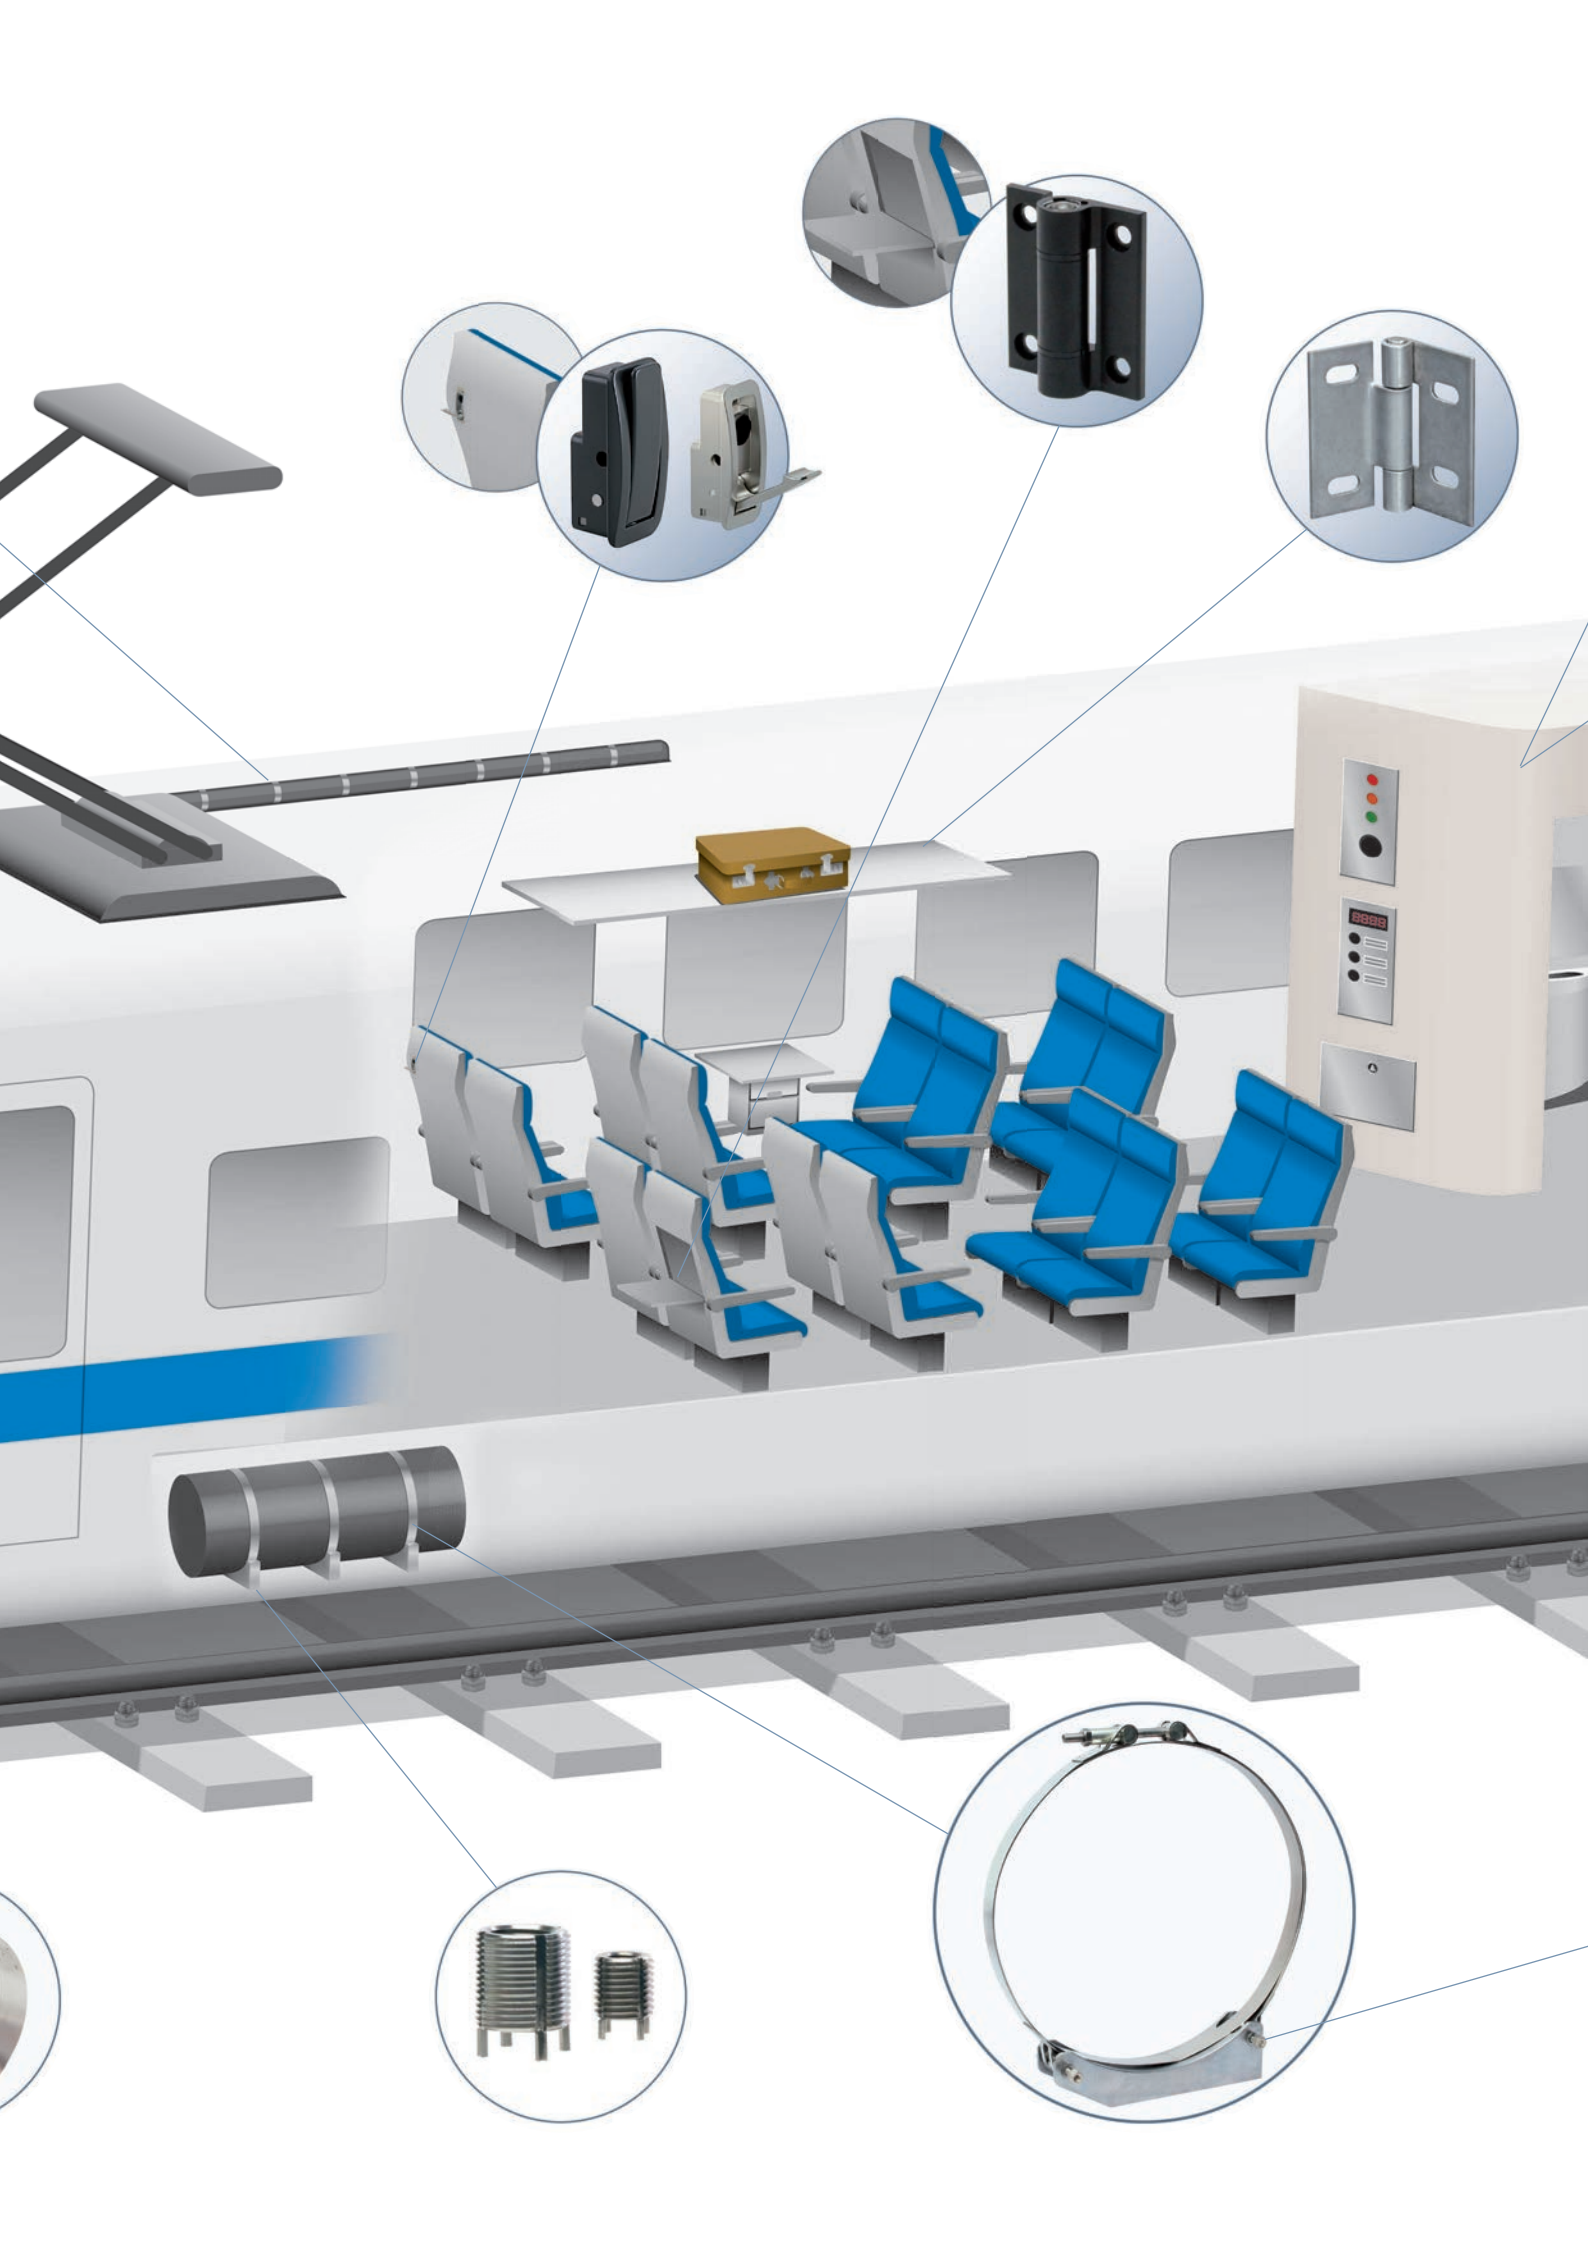

We follow your wishes and requirements while advising you with choosing the best closure system, the length and width or material of the band.

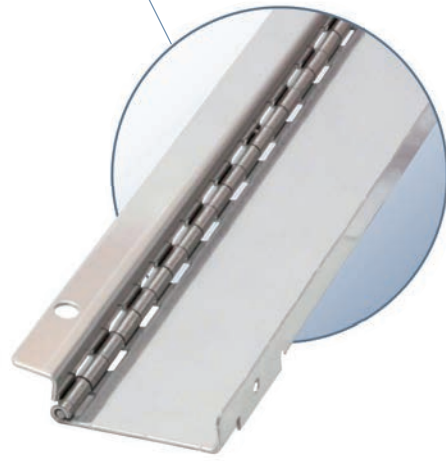

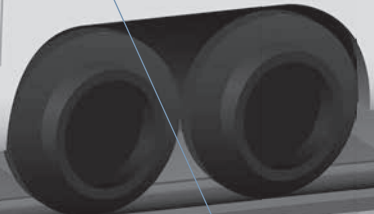

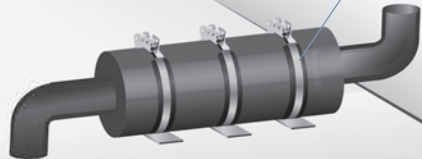

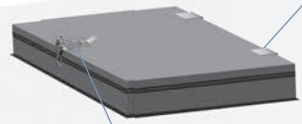

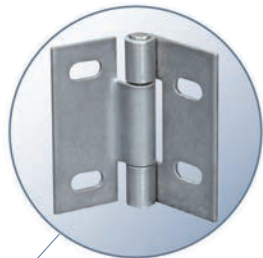

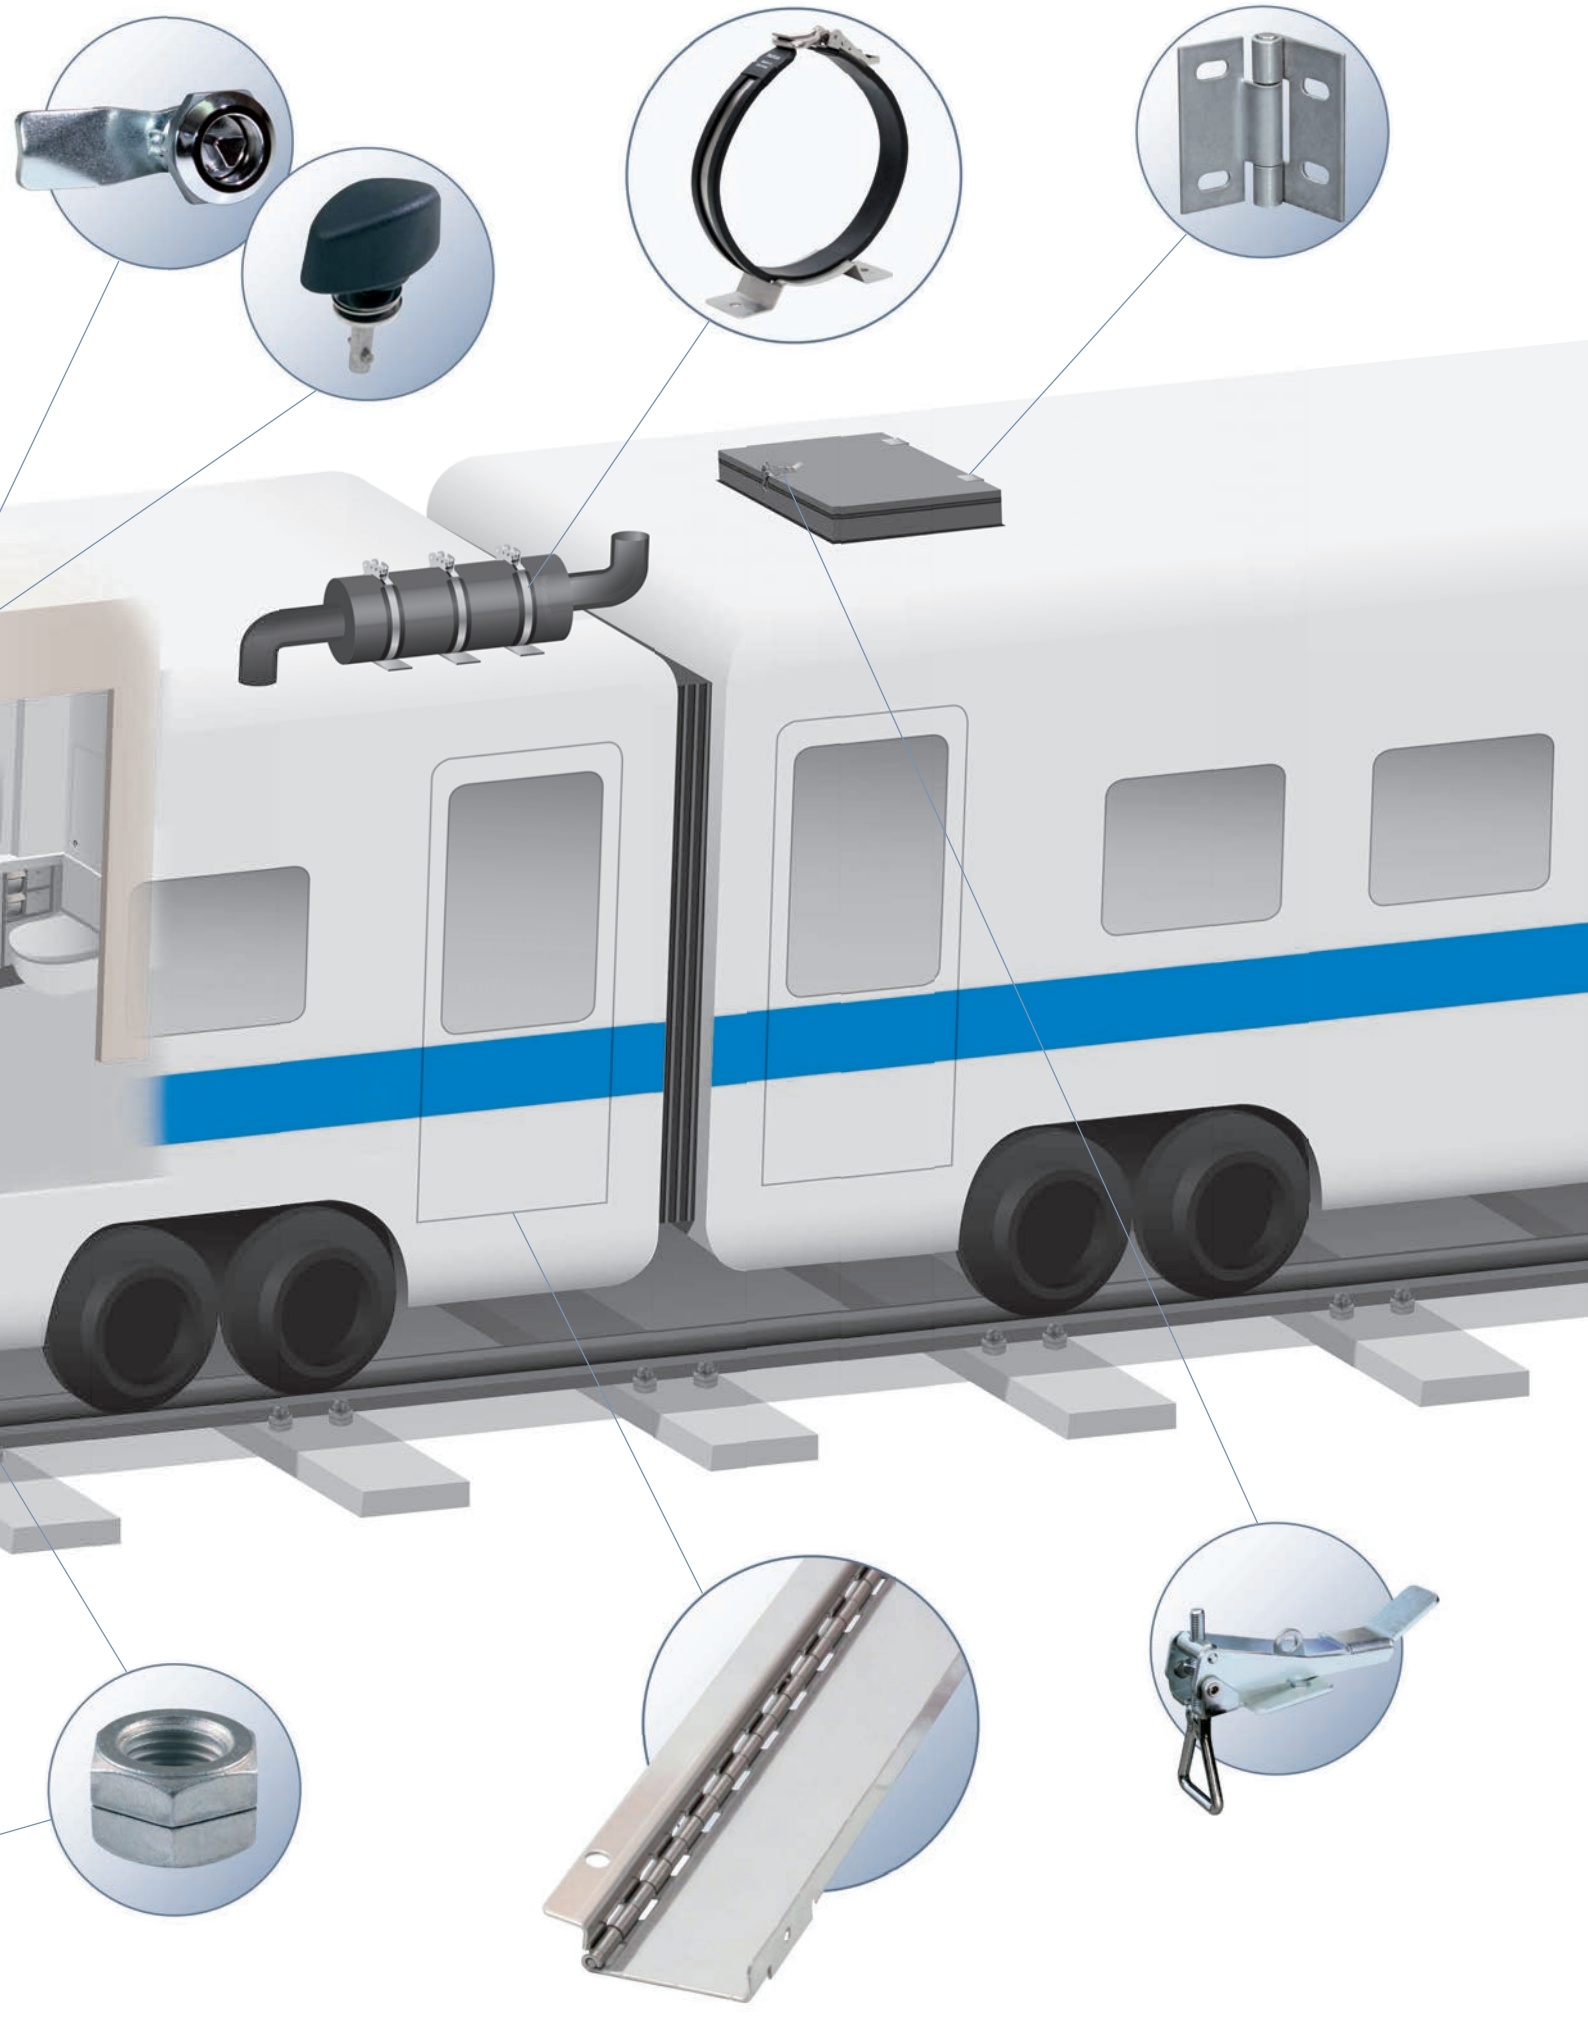

We solve your problem accurately regardless of the number of pieces.

On the following pages of this brochure we would like to give you an insight into the possibilities, which can be made with your wishes and our knowhow.

We are happy to advise you!

Hinge and locking technology

The hinge technology is like interface between innovation and design. As a service provider we are obligated, to offer to customer such a solution, which matches with the expectations and corresponds to the state-of-the-art.

As an international trading company we are representing many major companies with their product and service portfolio. So we have more than 14,000 standard products. Our products meet the needs of the hinge and locking technology. Nevertheless, 60% of our services are customized solutions and products.

Construction

For custom made solutions HoKon has his own Design department, where the wishes of the customer can be drawn or printed in a 3D model. Also the engineering department develop special solutions for the customer.

Prototype and sample production

In our own production we produce samples and pilot series for the series release. If all customer requirements are fulfilled, in terms of technology and design, there will be made the decision to produce the serial in most economical way.

Certification

All processes at HoKon are strictly controlled in accordance with DIN ISO 9001/2015 and ISO 14001 and ISO/TS 22163 (IRIS). Quality management and security are essential elements of this process.

"We are located in Phoenix-West, because as an international trading company we benefit from Dortmund's central location in Europe."

Products

Hinges

We provide hinges in different lengths, materials, surfaces and drilled or not-drilled:
